DETAILED ACTION

This action is in response to the application filed on 31 July 2001 in which claim 1 is pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Martin (U.S. Patent No. 5,758,852).

Regarding claim 1, Martin teaches a rigging system (fig. 1-2, 19-26) adapted to be coupled to a plurality of line array speakers (fig. 19-26) comprising a plurality of frames (1) having openings (at the ends of 2, 3; col. 6, lines 9-12) for the insertion of pivoting, adjustable front and back, left and right hinges (26-33). Martin does not teach the rigging system attached at the left and right sides of the line array speaker; however, applying the rigging at the sides of the array speakers as opposed to the top of the array speakers would involve merely changing the orientation of the rigging which is generally recognized as being within the level of ordinary skill. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention made to attach the rigging system along the sides of the array speakers of Martin to change the angular displacement from a horizontal to vertical.
